## EXPERIENCE

**Software Engineering Intern**

Jul – Dec 2025

**Software house · Colombo**

- Shipped six features to a production React and Node.js app used by 20,000 retail customers.
- Wrote the integration tests for the checkout flow, raising coverage from 41% to 78%.
- Presented a caching proposal to the tech lead that cut a key API's response time by half.

**Final-Year Project — Crop Disease Detection**

2025 – 2026

**University of Colombo · Colombo**

- Trained an image classifier for four common paddy-leaf diseases on 6,000 locally collected photos, reaching 91% accuracy.
- Packaged the model as an offline Android app for field officers.
- Awarded best final-year project in the department.

**Campus Timetable App (side project)**

2024

**Self-initiated · Colombo**

- Built and maintained a timetable and room-finder app adopted by 400+ students in three months.
- Handled feature requests and bug reports from students through a public issue tracker.

## LEADERSHIP &amp; ACTIVITIES

**Treasurer, IEEE Student Branch** — Managed a LKR 1.2m annual budget and organised a 300-person technical symposium.

**Finalist, national university hackathon** — Top 5 of 60 teams with a flood-alert SMS service built in 24 hours.

**Peer tutor, data structures** — Weekly sessions for 30 first-year students across two semesters.
